B.Tech. in Computer Science and Engineering GPA: 3.6/4

SKILLS

Tools: SQL, Python, MS Excel (Advanced), Snowflake, R Studio, Tableau
Competencies: Segmentation, Promotion response modelling, Patient Analytics
Datasets: 867 Sales Data, CINV report, GPO Master Member File, IQVIA Xponent, Promotion Data, Speciality Pharmacy Data

PROFESSIONAL EXPERIENCE

Business Analyst **ACUITAS360** (New Jersey) [Jul 2024 – Mar 2025]

- Supported the Helsinn Therapeutics analytics team (client) to understand the current situation, analytics needs and provided recommendations using multiple datasets.
- Performed fuzzy matching to map accounts in OneOncology to 867 data using account demographic information to categorize accounts into multiple groups, calculate change in volume distribution over time and estimate share of absolute growth by group.
- Developed the volume concentration curves for Akynzeo to understand the spread of business and identify top accounts.
- Built an interactive Tableau dashboard for Akynzeo to measure multiple KPIs and analyze overall sales trends and performance.
- Created and delivered weekly Rebate Entity Reports for OneOncology, Unity, and multiple territories using Excel macros.
- Retrieved and prepared Akynzeo data from SQL databases to support the KAM tool.

Associate **COGNIZANT** (India) [Sep 2020 – Dec 2021]

MARKET MIX MODELING for a major product used for the treatment of Heart Failure

- Segmented physicians using multiple criteria, such as Physician Specialty, Market Decile, Product NRx Decile, Age
- **Predictive Modeling** - Estimated sales attributable to different promotional channels - Calls, Samples, Emails, Direct Mail & Paid Search; considered effect of brand equity (constant term), sales lag, and historical efforts.
- Calculated optimal spending and ROI for different promotional channels and physician segments.
- Modelled current month Rx as a function of promotion and previous month Rx to capture lag effects using Python.

Senior Software Engineer **NIHILENT LTD** (India) [Apr 2017 – Sep 2020]

SUPPORTING THE COMMERCIAL EXCELLENCE TEAM *for Specialty product used to treat Migraine.*

- Collaborated with the onshore team to deliver weekly and several monthly recurring reports.
- Reported different KPIs such as Referrals, Active patients, New starts, Restarts, Drop-offs, Demand, Ex-factory, Net Sales, Conversion rate, Turnaround time, Compliance rate, Persistency Curve.
- Introduced new KPIs to meet the changing business needs and managed client's expectations.
- Utilized multiple datasets such as Invoices data, SP dispense data, Retail dispense data, Referral data.
- Created 45 days biweekly and 60 days monthly At-risk reports to determine patients who were at risk of dropping-off therapy.
- Created PPT reports at launch and then transitioned the reports to Tableau dashboard once the business rules were stabilized.
- Designed and created Tableau Dashboards for the Sales and Marketing teams, seeking regular client feedback.

SPEAKER PROGRAM ANALYSIS *for a US based biotechnology company*

- Measured effectiveness and suggested better targeting to certain segments.
- Test Control (TC) – Collated sales, calls, speaker program attendee and cost data using common identifiers to create charts and summaries. Refreshed the analysis every quarter.

Programmer Analyst **COGNIZANT** (India) [Jan 2015 – Apr 2017]

- Developed and supported banking applications on Temenos T24, including application development, data migration, and integration.
